

Creating a website with a building and code.

Wix and Quack

Mr. Lynch

Portfolio

Instructions: Using the website Quackit.com you will look at how HTML works and use its website editor to see how changing the code will change the website. Next using some of those skills to create a website on Wix.com to publish what you have learned the last two days.

Quackit:

- With teacher instruction look through the different types of tags and tutorials on the website below.
 - <https://www.quackit.com/html/>
- Next using this weblink, see how adding information and code will change the text in the template.
 - https://www.quackit.com/html/html_editors/scratchpad/?example=/css/flexbox/tutorial/nested_flex_containers_example_2

Code.io:

www.Codepen.io sign up and paste a template of a website into your html side and change it to your preferences.

Wix:

- Using the website builder below, create an account that you will use for this week. You can use any email you have to create this account.
- You will be posting information about you learned each day in class here.
- You may add to it at home as well.
- Some codes from Quackit can be added as well.
 - <https://users.wix.com/signin?overrideLocale=en&referralInfo=HOMEPAGE&postLogin=https:%2F%2Fwww.wix.com%2Fmy-account%2Fsites%2F&postSignUp=https:%2F%2Fwww.wix.com%2Fnew%2Fvertical%3FreferralAdditionalInfo%3DHOMEPAGE>
- Use this template
 - <http://www.wix.com/website-template/view/html/1900?originUrl=http%3A%2F%2Fwww.wix.com%2Fwebsite%2Ftemplates%2Fhtml%2Fportfolio-cv%2F4&bookName=&galleryDocIndex=1&category=portfolio-cv>
- Or this one
 - <http://www.wix.com/website-template/view/html/794?originUrl=http%3A%2F%2Fwww.wix.com%2Fwebsite%2Ftemplates%3Fcriteria%3Dschooll&bookName=&galleryDocIndex=3>

Add as much as you can:

- Images
- Text
- Multiple pages
- Explore your options.
